EXECUTIVE DIRECTOR, TODD STAFFORD

Introducing: CML Powered Training Covering CML, new LMS features, PTSI TMS, the bookstore, and more!

What is CML Powered Training?

With the migration to the ProTech Skills Institute (PTSI) TMS complete, we are retiring the Demystifying CML and PTSI training and bringing you CML Powered Training which will cover a host of topics including computer-mediated learning, the new LMS features, the new PTSI TMS, the bookstore, and much more!

This one-day event is designed to give all training center staff the necessary information for understanding the updated content and how to get the most out of it. By the end of the day...

- **Committee Members** will gain some new ideas for creating policies and procedures for implementing CML and how facility operations may change.
- **Instructors** will have a better grasp on instructional delivery, LMS resources, and some immediate methods for using/delivering the CML courses and the new LMS features.
- **Office Managers and Administrators** will acquire tips, tricks, and best practices for workflows utilizing the etA bookstore and the new PTSI TMS.
- **Training Directors & Assistant Training Directors** will have a solid understanding of CML along with the new LMS features and how this new course type can allow for changes to be made at the training center to fit your local needs.

There will be four separate sessions taking place at this training, tailored to your role at the JATC.

We will kick off our first class in Kennewick, WA on October 10th.
[You can register now.](#)

Who should attend?

- Committee Members
- Instructors
- Office Managers and Administrators
